

The Life Whisperer

Take the 'What If?' Challenge

What is the '*what if?*' challenge? It is a series of questions that ask you to suspend what you currently believe to be true. It asks you to temporarily put aside what you think you know about the laws of nature, science, the universe, materialism and even religion. It suggests that you postpone any self doubt about your ability to have the things that you want. All these beliefs, self doubt and thoughts can be parked, ready to be picked up again (if you so choose) after you've tried the '*what if?*' challenge. This is my invitation to you. An invitation that is for everyone, regardless of age, sex, creed or colour...

The '*what if?*' challenge...

- * What if you discovered there was only one Universal Source of All That Is, Ever Has Been and Ever Will Be?
- * What if it didn't matter what people called this Source – God, Allah, Muhammad, Buddha, the Great Spirit, etc?
- * What if you realised you were part of that same stream of Universal Source, with the same divine qualities?
- * What if these divine qualities included energy and light?
- * What if you knew that every cell in the human body emits photons (a form of light)?
- * What if you learnt that the universe is composed of 96% energy, and only 4% matter?
- * What if you discovered that this energy flows through and surrounds us all?
- * What if you could see and feel the flow of this energy?
- * What if you realised that thoughts are also a divine quality and create energy waves?
- * What if you could access these divine qualities through meditation, intuition, feelings etc?
- * What if you understood as part of the divine stream of Universal Source, that love is the only power that exists?
- * What if you uncovered that you had chosen to be here at this time, in this physical plane, for a reason?
- * What if you understood that powerful intentions through positive thought could manifest goals in the physical world?
- * What if you realised that the Universe is naturally abundant?
- * What if you became aware that as part of the Divine Universe, this natural abundance is waiting for you?

Now... how would your life change if you believed in the what ifs?
